INDEX TO VOLUME 273

January-June, 1962

SUBJECT INDEX

Entries with (C) are Current Topics; those with (N) are National Bureau of Standards News; those with (R) Reader Opinion; those with (F) are Franklin Institute Laboratories contributions; those with (B) are Bartol Research Foundation contributions. Papers are listed under subject headings, with authors' names in parentheses following the title of the paper. Authors are listed, with titles of their papers, in alphabetical order in the Author Index.

A

Aerosols. Stabilized methylene chloride, 87(C)

Aids for the blind. Foghorn for the blind, 87(C)

Air conditioning. Thermoelectric air conditioner, 261(C)

Airborne radar. Antenna pattern for point reflectors on the spherical earth (Levine), 265

Allen, Henry Butler: Tribute to Henry Butler Allen (LePage), 529

Ambler, Ernest. Wetherill Medal, 348

Analog multiplication. A review of orthogonal square-wave functions and their application to linear networks (Hammond and Johnson), 211

Analysis of R-graphs. On the sign pattern of network matrices (Brown and Reed), 179

Antennas. Antenna autotrack receiver system, 540(C)

Antenna pattern for point reflectors on the spherical earth (Levine), 265

Applied mathematics. Statistical study of pulse-width modulated control systems (Gupta and Jury), 292

Architecture. Optical transmittance of louver systems (Moon and Spencer), 1

Associate Editors. Dr. Rupen Eksergian (1889–1961), 172(C)

William Francis Gray Swann, M.A., D.Sc., 1884–1962, 353(C)

Astrophysics. Determination of the spectra of extraterrestrial radicals, 167(N)

The gas pressure in cosmic electrical discharges (Bruce), 59

Atmospheric physics. Anisotropy in solar particles incident on polar regions during July 1961 (Pomerantz and Duggal), 242(B)

Charge transfer in the lightning stroke as determined by the magnetograph (Meese and Evans), 375

The cosmic ray storm of July, 1961 (Duggal and Pomerantz), 322(B)

Atomic medicine techniques, 86(C)

Automation. Time division data link, 85(C)

Aviation. Transistorized distance measuring equipment, 263(C)

B

Bacon, Edmund Norwood: Brown Medal, 527

Baker, James Gilbert. Cresson Medal, 430

Ballantine Medal. Arthur L. Schawlow, 527

Charles H. Townes, 527

Bartol Research Foundation

The cosmic ray storm of July, 1961 (Duggal and Pomerantz), 322(B)

Tribute to William Francis Gray Swann, M.A., D.Sc., 1884–1962 (Pomerantz), 419(B)

Beams. Small deflections of non-uniform beams (Gundersen and Iversen), 365

Bismuth. New physical effect in semi-metals, 262(C)

Book reviews

Abraham, Lewis H.: Structural design of missiles and spacecraft, 257

Aller, Lawrence H.: The abundance of the elements, 338

Alt, Franz L., ed.: Advances in computers, vol. 2, 257

Arnold, N. and L. Mauer: Gyrodynamics and its engineering applications, 334

Bates, D. R., ed.: Quantum theory, vols. II and III, 518

The cosmic ray storm of July, 1961 (Duggal and Pomerantz), 322(B)

Tribute to William Francis Gray Swann, M.A., D.Sc., 1884–1962 (Pomerantz), 419(B)

Beams. Small deflections of non-uniform beams (Gundersen and Iversen), 365

Bismuth. New physical effect in semi-metals, 262(C)

Book reviews

Abraham, Lewis H.: Structural design of missiles and spacecraft, 257

Aller, Lawrence H.: The abundance of the elements, 338

Alt, Franz L., ed.: Advances in computers, vol. 2, 257

Arnold, N. and L. Mauer: Gyrodynamics and its engineering applications, 334

Bates, D. R., ed.: Quantum theory, vols. II and III, 518

Book reviews (cont.)
Bazovsky, Igor: Reliability: theory and practice, 446
Beer, Arthur, ed.: Vistas in astronomy, vol. 4, 447
Blanco, V. M. and S. W. McCuskey: Basic physics of the solar system, 79
Boyko, Hugo: Science and the future of mankind, 160
Brandeis Summer Institute: 1961 lectures in theoretical physics, vol. I, 521
Buchholz, Werner, ed.: Planning a computer system, 523
Calabro, S. R.: Reliability principles and practices, 445
Champeix, R.: Physics and techniques of electron tubes, 522
Cohn, Harvey: A second course in number theory, 337
Davidson, Norman: Statistical mechanics, 523
Davies, J. T. and E. K. Rideal: Interfacial phenomena, 339
Delahay, Paul, ed.: Advances in electrochemistry and electrochemical engineering. Vol. 1, 163
Dieter, George E., Jr.: Mechanical metallurgy, 338
Dudley, Darle W., ed.: Gear handbook, 444
Eames, F. E., F. T. Banner, W. H. Blow and W. J. Clarke: Fundamentals of mid-tertiary stratigraphical correlation, 523
Emme, Eugene M.: Aeronautics and astronautics: an American chronology of science and technology in the exploration of space, 1915–1960, 81
Flagg, John F., ed.: Chemical processing of reactor fuels, 339
Flügge, S., ed.: Handbuch der physik, band III/1, principles of classical mechanics and field theory, 79
Frauenfelder, Hans: The Mössbauer effect, 522
Fried, Burton D. and Samuel D. Conte: The plasma dispersion function: the Hilbert transform of the Gaussian, 448
Fronsdal, Christian, ed.: Lecture notes on the many-body problem, 521
Gerard, George: Introduction to structural stability theory, 337
Grabbe, Eugene M., Simon Ramo and Dean E. Woolridge, ed.: Handbook of automation, computation, and control. Vol. 3, systems and components, 81
Book reviews (cont.)
Grubel, Ralph O., ed.: Metallurgy of elemental and compound semiconductors, 258
Guttmann, Werner H.: Concise guide to structural adhesives, 256
Hamermesh, Morton: Group theory, 337
Harris, L. Dale: Introduction to feedback systems, 82
Hartnett, J. P., ed.: Recent advances in heat and mass transfer, 162
Hawkins, Gerald S.: Splendor in the sky, 335
Headridge, J. B.: Photometric titrations, 257
Heftmann, Erich, ed.: Chromatography, 162
Hengstebeck, Robert J.: Distillation: principles and design procedures, 445
Hennie, Frederick C., III: Iterative arrays of logical circuits, 254
Henrici, Peter: Discrete variable methods in ordinary differential equations, 337
Holmes, P. J., ed.: The electrochemistry of semiconductors, 444
Hyder, H. R. McK., ed.: Progress in nuclear energy, 522
Jacobson, Nathan: Lie algebras, 522
Jammer, Max: Concepts of mass, 337
Jensen, Jorgen, George E. Townsend, Jr., John D. Kraft and Jyri Kork: Design guide to orbital flight, 444
Kallmann, H. and M. Silver, ed.: Symposium on electrical conductivity in organic solids, 521
Kipiniak, Walerian: Dynamic optimization and control, 162
Klein, Lewis, ed.: Dispersion relations and the abstract approach to field theory, 256
Kok, J. A.: Electrical breakdown of insulating liquids, 521
Krick, Edward V.: Methods engineering, 447
Kuhn, H. G.: Atomic spectra, 446
Kuo, Benjamin C.: Automatic control systems, 256
Landsberg, H. E. and J. Van Mieghem, ed.: Advances in geophysics, vol. 8, 335
Landsberg, P. T.: Thermodynamics, vol. 2, 254
Langer, Rudolph E., ed.: Electromagnetic waves, 258
Langmuir, David B., Ernst Stuklinger and J. M. Sellen, Jr., ed.: Electrostatic propulsion, 163

Book reviews (cont.)
Liebowitz, H. and J. M. Allen, ed.: Curricula in solid mechanics, 447
Lightfoot, Edgar: Moment distribution, 256
Lockwood, E. H.: A book of curves, 164
Lubahn, J. D. and R. P. Felgar: Plasticity and creep of metals, 338
Marin, Joseph: Mechanical behavior of engineering materials, 445
Martinson, Carl R. and Charles W. Sisler: Industrial painting: the engineering approach, 446
Meeuse, B. J. D.: The story of pollination, 82
Messiah, Albert: Quantum mechanics, vol. I, 446
Moelwyn-Hughes, E. A.: States of matter, 256
Morrison, Richard B. and Melva J. Ingle, ed.: Design data for aeronautics and astronautics, 444
Nara, Harry R., ed.: Vector mechanics for engineers, part I: statics, 257
O'Flaherty, Fred, William T. Roddy and Robert M. Lollar, ed.: The chemistry and technology of leather, vol. III, 520
Omer, Guy C., Jr., Harold L. Knowles, Belvey W. Mundy, and W. Herbert Yoho: Physical sciences: men and concepts, 523
Ordway, Frederick I., III: Advances in space science and technology, vol. 3, 440
Parker, Milton E. and John H. Litchfield: Food plant sanitation, 520
Parker, Rollin J. and Robert J. Studders: Permanent magnets and their application, 521
Pirani, M. and J. Yarwood: Principles of vacuum engineering, 447
Polya, George: Mathematical discovery, vol. I: on understanding, learning and teaching problem solving, 523
Read, Harold J., ed.: Hydrogen embrittlement in metal finishing, 258
Riordan, John: Stochastic service systems, 522
Robb, J. C. and F. W. Peaker, ed.: Progress in high polymers, Vol. 1, 164
Rogers, Grover L. and M. Lander Causey: Mechanics of engineering structures, 257
Rohsenow, Warren M. and Harry Y. Choi: Heat, mass and momentum transfer, 82
Rolsten, Robert F.: Iodide metals and metal iodides, 338
Book reviews (cont.)
Scheidegger, Adrian E.: Theoretical geomorphology, 445
Schlegel, Richard: Time and the physical world, 158
Schlesinger, Robert J.: Principles of electronic warfare, 164
Setlow, Richard B. and Ernest C. Pollard: Molecular biophysics, 446
Snyder, Nathan W., ed.: Energy conversion for space power, 163
Snyder, Nathan W., ed.: Space power systems, 163
Southworth, George C.: Forty years of radio research, 520
Stern, Arthur C., ed.: Air pollution, vol. I, 519
Stiltz, Harry L., ed.: Aerospace telemetry, 445
Surugue, J., ed.: Experimental methods in combustion research, 448
Talbot, L., ed.: Rarefied gas dynamics, 338
Thaler, George J. and Marvin P. Pastel: Analysis and design of nonlinear feedback control systems, 524
Thie, J. A.: Heavy water exponential experiments with ThO_2 and UO_2, 522
Thomson, William Tyrrel: Introduction to space dynamics, 439
Toulmin, Stephen, Douglas Bush, James S. Ackerman and Claude V. Palisca; edited by Hedley Howell Rhys; Seventeenth century science and the arts, 161
Traxler, Ralph N.: Asphalt: its composition, properties and uses, 159
Turnbull, H. W., ed.: The correspondence of Isaac Newton, vol. III, 1688–1694), 337
Vajda, S.: Mathematical programming, 80
Van Hagan, Charles E.: Report writers' handbook, 82
von Arx, W. S.: An introduction to physical oceanography, 446
Wexler, A.: Experimental science for the blind, 162
Whitrow, G. J.: The natural philosophy of time, 441
Wilson, Frank W., ed.: Handbook of fixture design, 444
Wright, J. K.: Shock tubes, 81
Yang, Chen Ning: Elementary particles, 256
Yuan, Luke C. L. and Chien-Shiung Wu, ed.: Methods of experimental physics, vol. 5A, 524

Book reviews (cont.)
Zetler, Robert L. and W. George Crouch: Successful communication in science and industry, 81
Boundary layer. Boundary layer instability, 515(N)
Boundary-value problems. On the approximate solution of Dirichlet-type problems with singularities on the boundary (Greenspan and Warten), 187
Bremsstrahlung process. Efficiency of a Geiger-Mueller tube for non-penetrating electrons (Frank), 91
Brown Medal. Edmund Norwood Bacon, 527
Building materials. Insulated building panels, 349(C)

C

Calibration. Calibration of neutron sources, 249(N)
Ceramics. High temperature jigs, 541(C)
Metal-ceramic, microminiature electronic components, 264(C)
Circuits. Fourier coefficients of power-law devices (Penfield), 107
New electronic circuit protector, 88C)
Clamer Medal. Alan Howard Cottrell, 430
Coatings. High-reflectance dielectric coatings, 176(C)
Polyethylene resins for extrusion coating, 90(C)
Coding. State diagram of linear sequential machines (Srinivasan), 383
Committee on Science and the Arts
Abstracts of proceedings of meetings: December 13, 1961, 78; January 10, 1962, 170; February 14. 1962, 252; March 14, 1962, 348; April 11, 1962, 430; May 9, 1962, 527
Awards (*See* under individual medals, for example, Franklin Medal. Medalists are listed alphabetically in main index, followed by name of medal, with page reference to the respective citations)
Communications. Automatic data exchange system, 174(C)
Discrete frequency synthesizer, 350(C)
Space shorthand, 86(C)
Time division data link, 85(C)
Ultrareliable tubes for communications satellites, 354(C)
Computation. On the approximate solution of Dirichlet-type problems with singularities on the boundary (Greenspan and Warten), 187
Computers. Computer analyzes effects of drugs, 536(C)
Complex circular charts (Morita and Sekiguti), 49
Computer for blood volume determinations, 177(C)
New computer for scientific use, 355(C)
New family of computers, 88(C)
Recording physiological measurements for data processing, 426(N)
Conductivity. Silver-filled conductive paint, 538(C)
Control. Statistical study of pulse-width modulated control systems (Gupta and Jury), 292
Cosmic gas jets. The gas pressure in cosmic electrical discharges (Bruce), 59(R)
Cosmic rays. The cosmic ray storm of July, 1961 (Duggal and Pomerantz), 322(B)
A general approach to the electromagnetic origin of cosmic ray energy (Swann), 421(B)
Note from Dr. W. F. G. Swann, 420(B)
Cottrell, Alan Howard. Clamer Medal, 430
Couplings. New type quick disconnect coupling, 540(C)
Cranes. Explosion-proof missile transport, 449(C)
Cresson Medal. James Gilbert Baker, 430
Wernher von Braun, 170
Cryogenics. Miniature helium expansion turbine with gas-lubricated bearings, 60(N)
Versatile electron energy analyzer, 331(N)
Crystallography. Electron spin resonance system, 451(C)
Multi-purpose crystal grower, 84(C)
Cut-sets. A Generalization of the cut-set (Yau), 31
Cygnatron. Note from Dr. W. F. G. Swann, 420(B)

D

Data compaction. Space shorthand, 86(C)
Data processing. Automatic data exchange system, 174(C)
New computer for scientific use, 355(C)
New family of computers, 88(C)
Recording physiological measurements for data processing, 426(N)
Deflections. Small deflections of non-uniform beams (Gundersen and Iversen), 365

Deformation. Experimental results in intermittent motion (Frisch-Fay), 283
Plastic and viscous deformation of redundant structures—prototypes for a general theory (Paul), 482
Describing functions. A new method for evaluating the describing function of hysteresis-type nonlinearities (Ku and Chen), 226
Detection systems. Antenna pattern for point reflectors on the spherical earth (Levine), 265
Dielectric coatings. High-reflectance dielectric coatings, 176(C)
Differential equations. On the approximate solution of Dirichlet-type problems with singularities on the boundary (Greenspan and Warten), 187
Dirichlet-type problems. On the approximate solution of Dirichlet-type problems with singularities on the boundary (Greenspan and Warten), 187
Double-valued nonlinearity. A new method for evaluating the describing function of hysteresis-type nonlinearities (Ku and Chen), 226

E

Education. The importance of technical education in industrial management (Holman), 69
Eksergian, Dr. Rupen (1889–1961), 172(C)
Elasticity. A Fourier-integral solution for the elastic quarter-plane (Iyengar), 25
Small deflections of non-uniform beams (Gundersen and Iversen), 365
Electric discharge theory. The gas pressure in cosmic electrical discharges (Bruce), 59(R)
Electrical discharge. Charge transfer in the lightning stroke as determined by the magnetograph (Meese and Evans), 375
Electromagnetics. A general approach to the electromagnetic origin of cosmic ray energy (Swann), 421(B)
Electronics. High-speed magnetic reed switch, 539(C)
Multi-purpose crystal grower, 84(C)
Electrons. Efficiency of a Geiger-Mueller tube for non-penetrating electrons (Frank), 91
Fastest electron accelerator, 449(C)
Energy. A general approach to the electromagnetic origin of cosmic ray energy (Swann), 421(B)

F

Feedback. Statistical study of pulse-width modulated control systems (Gupta and Jury), 292
Fictive isothermal surfaces. On the graphical solution of heat-flow problems having convection boundary conditions (Schenck), 123
Field theory. On measuring the phase velocity of an oscillating gravitational field (Cook), 453
Films. Silver-filled conductive paint, 538(C)
Filters. Network synthesis using Legendre and Hermite polynomials (Ku and and Drubin), 138
Fluid mechanics. Boundary layer instability, 515(N)
Foams. New technique for manufacturing flexible urethane foam materials, 451(C)
Franklin, Benjamin. Science—our heritage and our future (Laurence), 357
The Franklin Institute
Committee on Science and the Arts. *See* Committee on Science and the Arts in main index
Elliott Cresson Medal Fund report, 170
Journal of The Franklin Institute. *See* main index
Library. *See* Library of The Franklin Institute in main index
Meetings. *See* Meetings in main index
Membership roll of honor, 343
Presentation of the Vermilye Medal, 62
President's letter presenting the Annual Report for 1961, 531
Tribute to Henry Butler Allen (LePage), 529
Franklin Institute Laboratories
Contributions by staff members, 432
Frequency conversion. Fourier coefficients of power-law devices (Penfield), 107
Friction. Experimental results in intermittent motion (Frisch-Fay), 283
Functional relations. Complex circular charts (Morita and Sekiguti), 49

G

Gas. The gas pressure in cosmic electrical discharges (Bruce), 59(R)
Gas-lubricated bearings. Miniature helium expansion turbine with gas-lubricated bearings, 60(N)
Geiger-Mueller tubes. Efficiency of a Geiger-Mueller tube for non-penetrating electrons (Frank), 91

Genter, Albert Legrand. Longstreth Medal, 348
Geophysics. Efficiency of a Geiger-Mueller tube for non-penetrating electrons (Frank), 91
Goss, Wilbur H. Potts Medal, 430
Graph theory. A generalization of the cut-set (Yau), 31
Graphical calculation. Complex circular charts (Morita and Sekiguti), 49
Graphical solution. On the graphical solution of heat-flow problems having convection boundary conditions (Schenck), 123
Necessary and sufficient conditions for R-graph synthesis (Brown and Reed), 472
Gravitational field. On measuring the phase velocity of an oscillating gravitational field (Cook), 453

H

Harmonic effects. On measuring the phase velocity of an oscillating gravitational field (Cook), 453
Hayward, Raymond Webster. Wetherill Medal, 348
Heat flow. On the graphical solution of heat-flow problems having convection boundary conditions (Schenck), 123
Helium. Miniature helium expansion turbine with gas-lubricated bearings, 60(N)
Hermite polynomials. Network synthesis using Legendre and Hermite polynomials (Ku and Drubin), 138
High temperature. High temperature jigs, 541(C)
New thermoelectric material, 172(C)
History. Science—our heritage and our future (Laurence), 357
Holman, Eugene. Presentation of the Vermilye Medal, 62
Hoppes, Dale DuBois. Wetherill Medal, 348
Hudson, Ralph P. Wetherill Medal, 348
Hysteresis-type nonlinearities. A new method for evaluating the describing function of hysteresis-type nonlinearities (Ku and Chen), 226

I

Industrial management. The importance of technical education in industrial management (Holman) 69
Information theory. Statistical study of pulse-width modulated control systems (Gupta and Jury), 292
Injection molding. Polypropylene for injection molding, 541(C)
Instruments. Discrete frequency synthesizer, 350(C)
Electron spin resonance system 451(C)
Large screen sampling oscilloscope, 535(C)
Multiple-beam klystron, 537(C)
Portable ozone recorder, 352(C)
Portable scaler for field use, 539(C)
Insulation. All-metal thermal insulation, 355(C)
Insulated building panels, 349(C)
Ionosphere. Rocket data show feasibility of Topside Sounder satellite, 166(N)

J

Jigs. High temperature jigs, 541(C)
Journal of The Franklin Institute
Dr. Rupen Eksergian (1889–1961), 172(C)
Publications received: 83, 165, 258, 340, 442, 525
William Francis Gray Swann, M.A., D.Sc., 1884–1962, 353(C)

K

Kinetics. Oscillator bias and frequency response in nonlinear zero power kinetics (Shen), 201
Klystron. Multiple-beam klystron, 537(C)

L

Lamps. New metallic-vapor lamp, 541(C)
Lasers. Portable solid state laser, 262(C)
Legendre polynomials. Network synthesis using Legendre and Hermite polynomials (Ku and Drubin), 138
Library of The Franklin Institute
New Books: 77, 171, 253, 347, 431, 528
Light amplification. Portable solid state laser, 262(C)
Lighting. Brighter-than-sun floodlights, 260(C)
New metallic-vapor lamp, 541(C)
Optical transmittance of louver systems (Moon and Spencer), 1
Lightning. Charge transfer in the lightning stroke as determined by the magnetograph (Meese and Evans), 375
Linear sequential machines. State diagrams of linear sequential machines (Srinivasan), 383

Loading. A Fourier-integral solution for the elastic quarter-plane (Iyengar), 25
Plastic and viscous deformation of redundant structures—prototypes for a general theory (Paul), 482
Longstreth Medal. Albert Legrand Genter, 348
Walter O. Snelling, 527
Felix Zandman, 252
Louvers. Optical transmittance of louver systems (Moon and Spencer), 1
Lubrication. Experimental results in intermittent motion (Frisch-Fay), 283

M

Magnetics. Charge transfer in the lightning stroke as determined by the magnetograph (Meese and Evans), 375
Management. The importance of technical education in industrial management (Holman), 69
Man-made crystals. Multi-purpose crystal grower, 84(C)
Manufacturing. New metallurgical process, 356(C)
New technique for manufacturing flexible urethane foam materials, 451(C)
Mapping. On the graphical solution of heat-flow problems having convection boundary conditions (Schenck), 123
Mathematical physics. Fourier coefficients of power-law devices (Penfield), 107
Mathematics. Complex circular charts (Morita and Sekiguti), 49
Matrices. Necessary and sufficient conditions for R-graph synthesis (Brown and Reed), 472
On the sign pattern of network matrices (Brown and Reed), 179
Measurement. Sensors to measure oxygen levels, 349(C)
Transistorized distance measuring equipment, 263(C)
Versatile electron energy analyzer, 331(N)
Medical science. Atomic medicine techniques, 86(C)
Computer analyzes effects of drugs, 536(C)
Computer for blood volume determinations, 177(C)
Recording physiological measurements for data processing, 426(N)
Meetings of The Franklin Institute
Minutes of Stated Meeting: December 20, 1961, 76; January 17, 1962, 169; February 21, 1962, 252; March 21, 1962, 342; April 18, 1962, 429; May 16, 1962, 526
Membership roll of honor, 343
Metallic vapor lamps. New metallic-vapor lamp, 541(C)
Metallurgy. Foamed metals, 535(C)
New metallurgical process, 356(C)
Microminiaturization. Metal-ceramic, microminiature electronic components, 264(C)
Micropositioning. Semi-automatic machine for attaching whiskers, 175(C)
Microwaves. Multiple-beam klystron, 537(C)
Military engineering. Explosion-proof missile transport, 449(C)
New thermoelectric material, 172(C)
Time division data link, 85(C)
Miniaturization. High-speed magnetic reed switch, 539(C)
Missiles. CRPL aids missile tracking, 330(N)
Explosion-proof missile transport, 449(C)
Monitoring devices. Portable scaler for field use, 539(C)

N

Networks. A generalization of the cut-set (Yau), 31
Necessary and sufficient conditions for R-graph synthesis (Brown and Reed), 472
Network synthesis using Legendre and polynomials (Ku and Drubin), 138
Noise figure and network representation of noisy linear two-ports (Linden), 276
A review of orthogonal square-wave functions and their application to linear networks (Hammond and Johnson), 211
On the sign pattern of network matrices (Brown and Reed), 179
State diagram of linear sequential machines (Srinivasan), 383
Neutron detection. Anisotropy in solar particles incident on polar regions during July 1961 (Pomerantz and Duggal), 242(B)
Neutron sources. Calibration of neutron sources, 249(N)
Noise figure and network representation of noisy linear two-ports (Linden), 276
Nomography. Complex circular charts (Morita and Sekiguti), 49

Nonlinear circuit theory. Fourier coefficients of power-law devices (Penfield), 107
Nonlinear deflections. Experimental results in intermittent motion (Frisch-Fay), 283
Nonlinear zero power kinetics. Oscillator bias and frequency response in nonlinear zero power kinetics (Shen), 201
Nuclear reactors. Oscillator bias and frequency response in nonlinear zero power kinetics (Shen), 201

O

Oil. Device for containing oil slicks, 177(C)
Operational methods. Small deflections of non-uniform beams (Gundersen and Iversen), 365
Optics. Electro-optical transistor, 351(C)
Optical transmittance of louver systems (Moon and Spencer), 1
Orthogonal functions. A review of orthogonal square-wave functions and their application to linear networks (Hammond and Johnson), 211
Orthogonal mapping. On the graphical solution of heat-flow problems having convection boundary conditions (Schenck), 123
Oscillators. Oscillator bias and frequency response in nonlinear zero power kinetics (Shen), 201
Oscilloscopes. Large screen sampling oscilloscope, 535(C)
Oxygen. Sensors to measure oxygen levels, 349(C)
Ozone. Portable ozone recorder, 352(C)

P

Paint. Stabilized methylene chloride, 87(C)
Particle physics. Anisotropy in solar particles incident on polar regions during July 1961 (Pomerantz and Duggal), 242(B)
Fastest electron accelerator, 449(C)
A general approach to the electromagnetic origin of cosmic ray energy (Swann), 421(B)
Phase shift. A new method for evaluating the describing function of hysteresis-type nonlinearities (Ku and Chen), 226
Phase velocity. On measuring the phase velocity of an oscillating gravitational field (Cook), 453
Phototubes. Tubeless tube, 261(C)
Plasticity. Plastic and viscous deformation of redundant structures—prototypes for a general theory (Paul), 482
Plastics. Device for containing oil slicks, 177(C)
Polyethylene resins for extrusion coating, 88(C)
Polypropylene for injection molding, 541(C)
Polynomial functions. Network synthesis using Legendre and Hermite polynomials (Ku and Drubin), 138
Potts Medal. Wilbur H. Goss, 430
Power. New Solar power system, 175(C)
Power-law devices. Fourier coefficients of power-law devices (Penfield), 107
Printed circuits. Silver-filled conductive paint, 538(C)
Protective devices. New electronic circuit protector, 88(C)

Q

Quarter-plane. A Fourier-integral solution for the elastic quarter-plane (Iyengar), 25

R

Radar design. Antenna pattern for point reflectors on the spherical earth (Levine), 265
Radiation. The cosmic ray storm of July, 1961 (Duggal and Pomerantz), 322(B)
Optical transmittance of louver systems (Moon and Spencer), 1
Radio. CRPL aids missile tracking, 330(N)
Relativity. On measuring the phase velocity of an oscillating gravitational field (Cook), 453
Resonance. Electron spin resonance system, 451(C)
R-graph synthesis. Necessary and sufficient conditions for R-graph synthesis (Brown and Reed), 472
R-networks. On the sign pattern of network matrices (Brown and Reed), 179
Rockets. Timing devices used in Project Mercury, 542(C)

S

Sampled-data systems. Statistical study of pulse-width modulated control systems (Gupta and Jury), 292
Sampling. Large screen sampling oscilloscope, 535(C)

Satellites. Rocket data show feasibility of Topside Sounder satellite, 166(N)
Ultrareliable tubes for communications satellites, 354(C)
Scaler. Portable scaler for field use, 539(C)
Science history. Science—our heritage and our future (Laurence), 357
Seals. New type quick disconnect coupling, 540(C)
Semiconductors. New physical effect in semi-metals, 262(C)
Sequential machines. State diagram of linear sequential machines (Srinivasan), 383
Servo systems. Angular differentiating accelerometer, 264(C)
Schawlow, Arthur L.: Ballantine Medal, 527
Snelling, Walter O.: Longstreth Medal, 527
Solar flares. Anisotropy in solar particles incident on polar regions during July 1961 (Pomerantz and Duggal), 242(B)
Solar power. New Solar power system, 175(C)
Solid state. Portable solid state laser, 262(C)
Space research. Angular differentiating accelerometer, 264(C)
Brighter-than-sun floodlights, 260(C)
Foamed metals, 535(C)
Heat- and radiation-tolerant vacuum tubes, 353(C)
New solar power system, 175(C)
Rocket data show feasibility of Topside Sounder satellite, 166(N)
Space shorthand, 86(C)
Space system transistors record low failure rate, 177(C)
Test system duplicates outer space, 543(C)
Timing devices used in Project Mercury, 542(C)
Spectra. Determination of the spectra of extraterrestrial radicals, 167(N)
Noise figure and network representation of noisy linear two-ports (Linden), 276
A review of orthogonal square-wave functions and their application to linear networks (Hammond and Johnson), 211
Square-wave functions. A review of orthogonal square-wave functions and their application to linear networks (Hammond and Johnson), 211
State diagram of linear sequential machines (Srinivasan), 383
Stookey, Stanley Donald. Wetherill Medal, 78
Strength of materials. Experimental results in intermittent motion (Frisch-Fay), 283
Small deflections of non-uniform beams (Gundersen and Iversen), 365
Stress. A Fourier-integral solution for the elastic quarter-plane (Iyengar), 25
Stress-strain. Plastic and viscous deformation of redundant structures—prototypes for a general theory (Paul), 482
Structural analysis. Plastic and viscous deformation of redundant structures—prototypes for a general theory (Paul), 482
Swann, William Francis Gray, M.A., D.Sc., 1884–1962, 353(C)
Switching. Automatic data exchange system, 174(C)
High-speed magnetic reed switch, 539(C)
Synchrotrons. Fastest electron accelerator, 449(C)
System analysis. A new method for evaluating the describing function of hysteresis-type nonlinearities (Ku and Chen), 226
System theory. Statistical study of pulse-width modulated control systems (Gupta and Jury), 292

T

Technical education. The importance of technical education in industrial management (Holman), 69
Testing. Test system duplicates outer space conditions, 543(C)
Thermoelectricity. New thermoelectric material, 172(C)
Thermoelectric air conditioner, 261(C)
Timing. Timing devices used in Project Mercury, 542(C)
Townes, Charles H.: Ballantine Medal, 527
Tracking. Antenna autotrack receiver system, 540(C)
CRPL aids missile tracking, 330(N)
Transducers. Submersible transducer for ultrasonic cleaning, 354(C)
Transistors. Electro-optical transistor, 351(C)
Foghorn for the blind, 87(C)
Space system transistors record low failure rate, 177(C)
Transistorized distance measuring equipment, 263(C)
Transitions. State diagram of linear sequential machines (Srinivasan), 383

Transmittance. Optical transmittance of louver systems (Moon and Spencer), 1
Trees of a graph. A generalization of the cut-set (Yau), 31
Necessary and sufficient conditions for R-graph synthesis (Brown and Reed), 472
On the sign pattern of network matrices (Brown and Reed), 179
Two-ports. Noise figure and network representation of noisy linear two-ports (Linden), 276
Tubes. Heat- and radiation-tolerant vacuum tubes, 353(C)
Tubeless tube, 261(C)
Ultrareliable tubes for communications satellites, 354(C)
Ultrasonics. Submersible transducer for ultrasonic cleaning, 354(C)
Urethane. New technique for manufacturing flexible urethane foam materials, 451(C)

V

Vacuum tubes. Heat- and radiation-tolerant vacuum tubes, 353(C)
Varactors. Fourier coefficients of power-law devices (Penfield), 107
Vermilye Medal. Presentation of the Vermilye Medal, 62
von Braun, Wernher. Cresson Medal, 170

W

Wave mechanics. Boundary layer instability, 515(N)
Wetherill Medal. Ernest Ambler, 348
Raymond Webster Hayward, 348
Dale DuBois Hoppes, 348
Ralph P. Hudson, 348
Stanley Donald Stookey, 78
Chien-Shiung Wu, 348
Whiskers. Semi-automatic machine for attaching whiskers, 175(C)
Wu, Chien-Shiung. Wetherill Medal, 348

Z

Zandman, Felix. Longstreth Medal, 252
Zero power kinetics. Oscillator bias and frequency response in nonlinear zero power kinetics (Shen), 201

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced to the full entry. Entries with (B) indicate Bartol Research Foundation contributions; those with (F), Franklin Institute Laboratories contributions; those with (R), Reader Opinion.

INDEX TO VOLUME 274
July–December, 1962
SUBJECT INDEX

Entries with (C) are Current Topics; those with (N) are National Bureau of Standards News; those with (R) are Reader Opinion; those with (B) are Bartol Research Foundation Notes. Papers are listed under subject headings, with authors' names in parentheses following the title of the paper. Authors are listed, with titles of their papers, in alphabetical order in the Author Index.

A

Acoustics. Transistorized acoustic vibration analyzer, 163(C)

Active networks. A new approach to active RC network synthesis (Mitra), 185

A unique synthesis method of transformerless active RC networks (Mitra), 115

Adaptive systems. A statistical theory for parameter identification in physical systems (Wolf and Dietz), 369

Adhesives. Adhesive substances studied for dental applications, 233(N)

Adsorption. Analyzer for measuring surface area, 424(C)

Aeronautics. Minimum drag shapes, 336(C)

Agriculture. Miniaturization for plant life, 330(C)

Algebra. Topological analysis and synthesis of linear systems (Bellert), 425

Analysis. Analysis of parametrically excited systems (Ku and Yang), 452

Analytical study of a forward moving annular jet (Chang), 20

Matrix analysis of linear conservative systems (Pipes), 300

On optimal operation of communication nets (Cederbaum), 130

The principle of complementary energy in nonlinear elasticity (Pipes), 198

Rectangular pulse distortion due to a nonlinear complex transmission propagation constant (Wanselow), 178

Stability considerations for a tunnel diode circuit (Swamy), 444

Topological analysis and synthesis of linear systems (Bellert), 425

Annular jets. Analytical study of a forward moving annular jet (Chang), 20

Applied mathematics. The initial- and final-value theorems in Laplace transform theory (Rasof), 165

On optimal operation of communication nets (Cederbaum), 130

Applied mechanics. A specialized nonlinear thin plate inextensional bending theory (Borg), 98

Asphalts. Experiments confirm the colloidal theory of asphalts, 517(N)

Astronautics. Mechanics pack for space use, 163(C)

Personal shielding during lunar flight, 245(C)

Astronomy. P Cygni, γ Cassiopeiae and the planetary nebulae (Bruce), 284

Radio galaxies (Bruce), 401(R)

Astrophysics. The gas pressure in cosmic electrical discharges. II (Bruce), 55(R)

Atmospheric electricity. The protection of houses by lightning conductors—an historical review (Müller-Hillebrand), 34

Atmospheric physics. Radio galaxies (Bruce), 401(R)

Automata. Synthesis of probability transformers (Gill), 1

Automation. Automatic production of microcircuit blocks, 416(C)

Digital telemetering register, 418(C)

Machine diagnoses its own failures, 250(C)

Aviation. Zero gravity problem may be solved by radar, 73(C)

B

Ballantine Medal. Ali Javan, 156

Theodore H. Maiman, 156

Bending. A specialized nonlinear thin plate inextensional bending theory (Borg), 98

Boltzmann equation. A note on the relativistic

Boltzmann equation and some applications (Yadavalli), 315(R)
Bonding. Adhesive substances studied for dental applications, 233(N)
Gold coated alumina or beryllia, 160(C)
Book reviews
Ackoff, Russell L.: Scientific method: optimizing applied research decisions, 60
Adams, Carsbie C. and Wernher von Braun: Careers in astronautics and rocketry, 151
Ainsworth, G. C. and P. H. A. Sneath, ed.: Microbial classification, 61

C

Cables. Radiation-resistant instrumentation and control cable, 162(C)
Cameras. TV cameras observe underwater fueling, 416(C)
Capacitors. Capacitors for laser applications, 162(C)
The Mighty Pike, 57(N)
Ceramics. Ceramic photon counter, 532(C)
Circuits. Automatic production of microcircuit blocks, 416(C)
Matrix analysis of linear conservative systems (Pipes), 300
Stability considerations for a tunnel diode circuit (Swamy), 444
Clouds. Technique for cutting holes in "cold" clouds, 68(C)
Coatings. Gold coated alumina or beryllia, 160(C)
New anodized finish for zinc, 73(C)
Colloidal theory. Experiments confirm the colloidal theory of asphalts, 517(N)
Committee on Science and the Arts
Abstract of meetings: June 13, 1962, 156; October 10, 1962, 413
Awards (*See* under individual medals, for example, Franklin Medal. Medalists are listed alphabetically in main index, followed by name of medal, with page reference to the respective citations)
Communications. Automatic radio-telephone terminal, 160(C)
"Coherent light" for communications, 334(C)
Communication through beams of light, 244(C)
Electronic transmission of microfilm records, 420(C)
Emergency call system, 423(C)
Nonfading radio reception, 532(C)
On optimal operation of communication nets (Cederbaum), 130
Sun-powered lasers, 531(C)
Transportable tropospheric scatter system, 246(C)
Complementary energy. The principle of complementary energy in nonlinear elasticity (Pipes), 198
Computers. Automath, 246(C)
Computer control of papermaking, 419(C)
Computer "speaks" German, 535(C)
Computer tire design and testing, 532(C)
Desk-top computer simulates nuclear power plant, 424(C)
Digital telemetering register, 418(C)
High-speed serial binary adder, 162(C)
Hybrid computer, 70(C)
Low-cost data processing system, 530(C)
New computer technique converts satellite cloud photos to mercator views, 333(C)
Conformal mapping. Non-Euclidean geometric representations for lossy microwave networks (Kaplan and Stock), 475
Control systems. Computer control of papermaking, 419(C)
On periodic modes of saturating discrete control systems (Torng), 358
Zero gravity problem may be solved by radar, 73(C)
Correlation. A statistical theory for parameter identification in physical systems (Wolf and Dietz), 369
Cosmic discharge. Radio galaxies (Bruce), 401(R)
Cosmic gas jets. The gas pressure in cosmic electrical discharges. II (Bruce), 55(R)
Counters. Ceramic photon counter, 532(C)
Cresson Medal. Grote Reber, 413

Crystallography. Direct process for making diamonds, 421(C)
Cylinders. Heat flow in composite slab, cylinder, and sphere (Reid), 352

D

Data processing. Automath, 246(C)
Computer "speaks" German, 535(C)
Low-cost data processing system, 530(C)
New static card reader, 163(C)
Dentistry. Adhesive substances studied for dental applications, 233(N)
Design. Computer tire design and testing, 532(C)
Diamonds. Direct process for making diamonds, 421(C)
Dielectrics. Propagation modes on a dielectric coated wire (Zelby), 85
Diodes. High-speed serial binary adder, 162(C)
Photomixer diode detector, 158(C)
Stability considerations for a tunnel diode circuit (Swamy), 444
Discharge theory. Radio galaxies (Bruce), 401(R)
Discrete control systems. On periodic modes of saturating discrete control systems (Torng), 358
Distortion. Rectangular pulse distortion due to a nonlinear complex transmission propagation constant (Wanselow), 178
Doppler effect. The shape of the Doppler-broadened nuclear resonance fluorescence line (Deutch), 227(B)
Drag. Minimum drag shapes, 336(C)
Drilling. Stable platform for deep sea work, 330(C)
Dry ice. Technique for cutting holes in "cold" clouds, 68(C)

E

Education. Useful knowledge (Townes), 512
Elasticity. The principle of complementary energy in nonlinear elasticity (Pipes), 198
Electric discharge theory. The gas pressure in cosmic electrical discharges. II (Bruce), 55(R)
P Cygni, γ Cassiopeiae and the planetary nebulae (Bruce), 284
Electricity. The protection of houses by lightning conductors—an historical review (Müller-Hillebrand), 34
Electromagnetics. Propagation modes on a dielectric coated wire (Zelby), 85
Electron beams. Electron-optical image of a pulsed atomic beam, 316(N)
A note on the relativistic Boltzmann equation and some applications (Yadavalli), 315(R)
Electronics. Hybrid computer, 70(C)
New medical electronics technique, 72(C)
Energy level. Application of linear graphs to multilevel maser analysis (Bedrosian), 278
Calculation of the normalized population distribution of multilevel maser systems by the inspection method (Keating and Barker), 253
Engineering. To a successful conclusion (LePage), 142

F

Fatigue. Fatigue life of metals extended in vacuum, 534(C)
Final-value theorems. The initial- and final-value theorems in Laplace transform theory (Rasof), 165
Flow. Analytical study of a forward moving annular jet (Chang), 20
Flowers. Miniaturization for plant life, 330(C)

Meetings. *See* main index
To a successful conclusion (LePage), 142
Franklin Medal. Geoffrey Ingram Taylor, 156

G

Galaxies. Radio galaxies (Bruce), 401(R)
Gas. The gas pressure in cosmic electrical discharges. II (Bruce), 55(R)
Gas dynamics. Electron-optical image of a pulsed atomic beam, 316(N)
Geophysics. Moon pressure gauges, 424(C)
New computer technique converts satellite cloud photos to mercator views, 333(C)
Glass. Improved glass Dewar flask for low temperature research, 149(N)
Gold. Gold coated alumina or beryllia, 160(C)

Graph theory. Application of linear graphs to multilevel maser analysis (Bedrosian), 278
On optimal operation of communication nets (Cederbaum), 130
Proof of a combinatorial formula in the theory of multilevel maser systems (Hobbs), 270
Graphs. On two-tree transformations and the separation of two-tree sets (Ali), 337
Guidance. Velocity measurements of missiles and space vehicles, 332(C)
Gyroscopes. Crystal ball to aid space-age navigation, 244(C)

H

Harlow, James Hayward Harlow, III. Newcomen Medal, 413
Heat flow. Heat flow in composite slab, cylinder, and sphere (Reid), 352
Heat transfer. New heat transfer medium, 331(C)
High temperature. High-temperature silica material, 159(C)
High-temperature tantalum-tube furnace, 147(N)
Hybrid computer, 70(C)

I

Incompressible flow. Analytical study of a forward moving annular jet (Chang), 20
Information retrieval. Electronic transmission of microfilm records, 420(C)
Infrared. New "laser" developed, 71(C)
Initial-value theorems. The initial- and final-value theorems in Laplace transform theory (Rasof), 165
Inspection method. Calculation of the normalized population distribution of multilevel maser systems by the inspection method (Keating and Barker), 253
Instruments. Moon pressure gauges, 424(C)
Zenith-nadir transits, 533(C)

J

Javan, Ali Ballantine Medal, 156
Journal of The Franklin Institute
Journal goes to Photon composition, 74(C)
Publications received: 64, 154, 241, 326, 415, 525

K

Kroon, Reinout P. Longstreth Medal, 413

L

Laboratory equipment. New optical bench, 249(C)
Laplace transforms. The initial- and final-value theorems in Laplace transform theory (Rasof), 165
Lasers. Capacitors for laser applications, 162(C)
"Coherent light" for communications, 334(C)
Communication through beams of light, 244(C)
New "laser" developed, 71(C)
Photomixer diode detector, 158(C)
Sun-powered lasers, 531(C)
Liberty Bell. To a successful conclusion (LePage), 142
Library of The Franklin Institute
New Books: 66, 157, 242, 327, 414, 527
Light. Miniature timing light generator, 250(C)
New "laser" developed, 71(C)
Optical maser amplifier, 329(C)
Lightning protection. The protection of houses by lightning conductors—an historical review (Müller-Hillebrand), 34
Linear graphs. Application of linear graphs to multilevel maser analysis (Bedrosian), 278
Proof of a combinatorial formula in the theory of multilevel maser systems (Hobbs), 270
Longstreth Medal
Reinout P. Kroon, 413
Carlos B. Mirick, 156
Matthew H. Schrenk, 156
Stewart Way, 413
Low temperature. High impact polystyrene for refrigerator market, 69(C)
Improved glass Dewar flask for low temperature research, 149(N)

M

Maiman, Theodore H. Ballantine Medal, 156
Man-made diamonds. Direct process for making diamonds, 421(C)
Marine platform. Stable platform for deep sea work, 330(C)
Markov chains. Synthesis of probability transformers (Gill), 1

Masers. Application of linear graphs to multilevel maser analysis (Bedrosian), 278
Calculation of the normalized population distribution of multilevel maser systems by the inspection method (Keating and Barker), 253
Gaseous optical masers, 249(C)
Optical maser amplifier, 329(C)
Proof of a combinatorial formula in the theory of multilevel maser systems (Hobbs), 270
Useful knowledge (Townes), 512
Materials. High impact polystyrene for refrigerator market, 69(C)
Matrices. Matrix analysis of linear conservative systems (Pipes), 300
Proof of a combinatorial formula in the theory of multilevel maser systems (Hobbs), 270
On two-tree transformations and the separation of two-tree sets (Ali), 337
Matrix methods. Analysis of parametrically excited systems (Ku and Yang), 452
Measurement. Analyzer for measuring surface area, 424(C)
Experimental transition probabilities, 409(N)
Semiconductor test set measures slice thickness, 417(C)
Velocity measurements of missiles and space vehicles, 332(C)
Medal Day Proceedings, 488
Medical science. New medical electronics technique, 72(C)
Portable blood pressure and heart rate monitoring system, 329(C)
Meetings of The Franklin Institute
Minutes of Stated Meeting: October 17, 1962, 412; November 21, 526
Memory devices. Automatic memory core tester, 336(C)
Low-cost data processing system, 530(C)
Metallurgy. Fatigue life of metals extended in vacuum, 534(C)
Meteorology. Technique for cutting holes in "cold" clouds, 68(C)
Microfilm. Electronic transmission of microfilm records, 420(C)
Microwave networks. Non-Euclidean geometric representations for lossy microwave networks (Kaplan and Stock), 475
Microwave transmission. "Coherent light" for communications, 334(C)
Rectangular pulse distortion due to a nonlinear complex transmission propagation constant (Wanselow), 178
Miniaturization. Microsize magnetic field probes, 234(N)
Miniaturization for plant life, 330(C)
Tantalum-nitride technique improves resistors, 161(C)
Mirick, Carlos B. Longstreth Medal, 156
Monitoring. Portable blood pressure and heart rate monitoring system, 329(C)

N

Navigation. Crystal ball to aid space-age navigation, 244(C)
Transistorized radio navigational beacon, 70(C)
Nebulae. P Cygni, γ Cassiopeiae and the planetary nebulae (Bruce), 284
Networks. A new approach to active RC network synthesis (Mitra), 185
Non-Euclidean geometric representations for lossy microwave networks (Kaplan and Stock), 475
On optimal operation of communication nets (Cederbaum), 130
Topological analysis and synthesis of linear systems (Bellert), 425
On two-tree transformations and the separation of two-tree sets (Ali), 337
A unique synthesis method of transformerless active RC networks (Mitra), 115
Newcomen Medal. James Hayward Harlow, III, 413
n-loop circuits. Matrix analysis of linear conservative systems (Pipes), 300
Nonlinear plate theory. A specialized nonlinear thin plate inextensional bending theory (Borg), 98
Nonlinear systems. Analysis of parametrically excited systems (Ku and Yang), 452
The principle of complementary energy in nonlinear elasticity (Pipes), 198
n-ports. A new approach to active RC network synthesis (Mitra), 185
Nuclear physics. Desk-top computer simulates nuclear power plant, 424(C)
The shape of the Doppler-broadened nuclear resonance fluorescence line (Deutch), 227(B)

O

Oceanography. Stable platform for deep sea work, 330(C)

Optics. Communication through beams of light, 244(C)
Electron-optical image of a pulsed atomic beam, 316(N)
Gaseous optical masers, 249(C)
New optical bench, 249(C)
Optical maser amplifier, 329(C)
Photo-Incremag counting device, 159(C)
Oscillations. Matrix analysis of linear conservative systems (Pipes), 300
On periodic modes of saturating discrete control systems (Torng), 358

P

Paper. Computer control of papermaking, 419(C)
Tearing strength standard for paper, 57(N)
Parametric excitation. Analysis of parametrically excited systems (Ku and Yang), 452
Particle physics. Experiments confirm the colloidal theory of asphalts, 517(N)
Periodicity. On periodic modes of saturating discrete control systems (Torng), 358
Perturbation. Analytical study of a forward moving annular jet (Chang), 20
Photoelectric devices. Photo-Incremag counting device, 159(C)
Photography. Miniature timing light generator, 250(C)
TV cameras observe underwater fueling, 416(C)
Photon. Journal goes to Photon composition, 74(C)
Planetary nebulae. P Cygni, γ Cassiopeiae and the planetary nebulae (Bruce), 284
Plasma physics. A note on the relativistic Boltzmann equation and some applications (Yadavalli), 315(R)
Plastics. High impact polystyrene for refrigerator market, 69(C)
Plate theory. A specialized nonlinear thin plate inextensional bending theory (Borg), 98
Polypropylene. Polypropylene yarn for cordage, 246(C)
Population distribution. Calculation of the normalized population distribution of multilevel maser systems by the inspection method (Keating and Barker), 253
Proof of a combinatorial formula in the theory of multilevel maser systems (Hobbs), 270
Printing. Journal goes to Photon composition, 74(C)
Probability. A statistical theory for parameter identification in physical systems (Wolf and Dietz), 369
Synthesis of probability transformers (Gill), 1
Probes. Microsize magnetic field probes, 234(N)
Programming. Automath, 246(C)
Computer "speaks" German, 535(C)
Pulse distortion. Rectangular pulse distortion due to a nonlinear complex transmission propagation constant (Wanselow), 178
Punched cards. New static card reader, 163(C)

R

Radar. Zero gravity problem may be solved by radar, 73(C)
Radiation. Radiation-resistant instrumentation and control cable, 162(C)
Silicon solar cells as radiation detectors, 68(C)
Radio. Automatic radio-telephone terminal, 160(C)
Nonfading radio reception, 532(C)
Transistorized radio navigational beacon, 70(C)
Random numbers. Synthesis of probability transformers (Gill), 1
RC networks. A new approach to active RC network synthesis (Mitra), 185
A unique synthesis method of transformerless active RC networks (Mitra), 115
Reactors. Desk-top computer simulates nuclear power plant, 424(C)
Reber, Grote. Cresson Medal, 413
Re-entry. Space vehicles televised on re-entry, 247(C)
Research. Useful knowledge (Townes), 512
Resistors. Tantalum-nitride technique improves resistors, 161(C)
Resonance fluorescence. The shape of the Doppler-broadened nuclear resonance fluorescence line (Deutch), 227(B)

S

Safety engineering. The protection of houses by lightning conductors—an historical review (Müller-Hillebrand), 34
Scattering. Transportable tropospheric scatter system, 246(C)
Schrenk, Matthew. Longstreth Medal, 156
Science. Useful knowledge (Townes), 512

Semiconductors. Automatic production of microcircuit blocks, 416(C)
Semiconductor test set measures slice thickness, 417(C)
Sequential machines. Synthesis of probability transformers (Gill), 1
Shielding. Personal shielding during lunar flight, 245(C)
Signalling system. Emergency call system, 423(C)
Silica. High-temperature silica material, 159(C)
Silicon. Silicon solar cells as radiation detectors, 68(C)
Slabs. Heat flow in composite slab, cylinder, and sphere (Reid), 352
Solar cells. Silicon solar cells as radiation detectors, 68(C)
Space research. Ceramic photon counters, 532(C)
Crystal ball to aid space-age navigation, 244(C)
Extremely high vacuum chamber, 418(C)
Mechanics pack for space use, 163(C)
New computer technique converts satellite cloud photos to mercator views, 333(C)
Personal shielding during lunar flight, 245(C)
Space chamber hits record pressure, 248(C)
Space chamber provides motion in ultrahigh vacuum, 158(C)
Space vehicles televised on re-entry, 247(C)
Sun-powered lasers, 531(C)
Velocity measurements of missiles and space vehicles, 332(C)
Spectral lines. Experimental transition probabilities, 409(N)
Spheres. Heat flow in composite slab, cylinder, and sphere (Reid), 352
Stability. Stability considerations for a tunnel diode circuit (Swamy), 444
Stars. P Cygni, γ Cassiopeiae and the planetary nebulae (Bruce), 284
Statistical parameter identification. A statistical theory for parameter identification in physical systems (Wolf and Dietz), 369
Steady state. Application of linear graphs to multilevel maser analysis (Bedrosian), 278
Calculation of the normalized population distribution of multilevel maser systems by the inspection method (Keating and Barker), 253
Proof of a combinatorial formula in the theory of multilevel maser systems (Hobbs), 270
Structural analysis. The principle of complementary energy in nonlinear elasticity (Pipes), 198
Surface area. Analyzer for measuring surface area, 424(C)
Surface waves. Propagation modes on a dielectric coated wire (Zelby), 85
Surveying. Zenith-nadir transits, 533(C)
Synthesis. A new approach to active RC network synthesis (Mitra), 185
Synthesis of probability transformers (Gill), 1
Topological analysis and synthesis of linear systems (Bellert), 425
A unique synthesis method of transformerless active RC networks (Mitra), 115
System analysis. Analysis of parametrically excited systems (Ku and Yang), 452
A statistical theory for parameter identification in physical systems (Wolf and Dietz), 369
Topological analysis and synthesis of linear systems (Bellert), 425

T

Tantalum. Automatic production of microcircuit blocks, 416(C)
Taylor, Geoffrey Ingram. Franklin Medal, 156
Tearing strength. Tearing strength standard for paper, 57(N)
Technology. Useful knowledge (Townes), 512
Telemetering. Digital telemetering register, 418(C)
Telephony. Machine diagnoses its own failures, 250(C)
Television. Space vehicles televised on re-entry, 247(C)
TV cameras observe underwater fueling, 416(C)
Temperature. Experimental transition probabilities, 409(N)
Testing. Automatic memory core tester, 336(C)
Computer tire design and testing, 532(C)
Extremely high vacuum chamber, 418(C)
Semiconductor test set measures slice thickness, 417(C)
Space chamber hits record pressure, 248(C)
Space chamber provides motion in ultrahigh vacuum, 158(C)
Vibration exciter systems, 160(C)
Thermal conductivity. Heat flow in composite slab, cylinder, and sphere (Reid), 352
Thermocouples. High-temperature tantalum-tube furnace, 147(N)

Tires. Computer tire design and testing, 532(C)
Topology. Application of linear graphs to multilevel maser analysis (Bedrosian), 278
Calculation of the normalized population distribution of multilevel maser systems by the inspection method (Keating and Barker), 253
On optimal operation of communication nets (Cederbaum), 130
Proof of a combinatorial formula in the theory of multilevel maser systems (Hobbs), 270
Topological analysis and synthesis of linear systems (Bellert), 425
On two-tree transformations and the separation of two-tree sets (Ali), 337
Transformations. On two-tree transformations and the separation of two-tree sets (Ali), 337
Transformers. The Mighty Pike, 57(N)
Synthesis of probability transformers (Gill), 1
Transforms. The initial- and final-value theorems in Laplace transform theory (Rasof), 165
Transistors. Transistorized acoustic vibration analyzer, 163(C)
Transistorized radio navigational beacon, 70(C)
Transitions. Calculation of the normalized population distribution of multilevel maser systems by the inspection method (Keating and Barker), 253
Transits. Zenith-nadir transits, 533(C)
Transmission. Propagation modes on a dielectric coated wire (Zelby), 85
Rectangular pulse distortion due to a nonlinear complex transmission propagation constant (Wanselow), 178
A statistical theory for parameter identification in physical systems (Wolf and Dietz), 369
Travel. Emergency call system, 423(C)
Trees of a graph. On two-tree transformations and the separation of two-tree sets (Ali), 337
Tunnel diodes. Stability considerations for a tunnel diode circuit (Swamy), 444
Two ports. Non-Euclidean geometric representations for lossy microwave networks (Kaplan and Stock), 475
Two trees. On two-tree transformations and the separation of two-tree sets (Ali), 337

V

Vacuum. Electron-optical image of a pulsed atomic beam, 316(N)
Extremely high vacuum chamber, 418(C)
Fatigue life of metals extended in vacuum, 534(C)
Moon pressure gauges, 424(C)
Space chamber provides motion in ultrahigh vacuum, 158(C)
Variable stars. P Cygni, γ Cassiopeiae and the planetary nebulae (Bruce), 284
Velocity distribution. Analytical study of a forward moving annular jet (Chang), 20
Vibration. Transistorized acoustic vibration analyzer, 163(C)
Vibration exciter systems, 160(C)

W

Waveforms. Rectangular pulse distortion due to a nonlinear complex transmission propagation constant (Wanselow), 178
Waveguides. Propagation modes on a dielectric coated wire (Zelby), 85
Way, Stewart. Longstreth Medal, 413
White noise. A statistical theory for parameter identification in physical systems (Wolf and Dietz), 369
Wire. Propagation modes on a dielectric coated wire (Zelby), 85

X

X-rays. New medical electronics technique, 72(C)

Y

Yarn. Polypropylene yarn for cordage, 246(C)

Z

Zinc. New anodized finish for zinc, 73(C)

AUTHOR INDEX

Full titles of papers are listed only under first authors; all co-authors are cross-referenced to the full entry. Entries with (R) are Reader Opinion; those with (B) are Bartol Research Foundation Notes.
